

Project Unit – Important Teacher Notes

Sports Banner – Project

- Check with custodians/person who hangs banners for location where banners will be displayed, you may have to adhere to certain sizes.
- If banners will be hung up outside – it is important to note the vinyl cannot withstand very windy conditions, it will tear.
- Be sure you know how to grommet. After you learn, have the students practice on scrap vinyl so they become proficient on grommeting. You don't want to ruin a good banner because of grommeting mistakes. **Be sure the grommets on the banner are spaced appropriately.** Presentation Systems does have a special grommet tool and grommets you can purchase or **see below:**
 - I usually purchase my grommets from Harbor Freight

- Be sure your students have access to the school logo and give them the html color codes of your school color. For example, we are Vegas gold and black, so I Googled Vegas Gold html code, and it will give you that code, #C5B358. Then you can just type that in Canva in the color section. You can also use the **Add a New Color Button**, select the dropper tool and click on part of the player's uniform color you want. This ensures all the elements on the banner match. If you are unsure of your school's html color code use this site, <https://htmlcolorcodes.com/> to see a variety of colors.
- Have students Google “senior banner ideas” for some inspiration before they begin.
